

Moncton High School's Bring Your Own Device Program

Our Goal: Learning, Publishing, Collaborating, Digital Citizenship

Dear Parents/Guardians:

Moncton High School is committed to preparing our students for the 21st century and we want them to be highly successful as they graduate and pursue further education, training and careers.

We want all of our students to think critically and creatively, communicate effectively, problem solve and collaborate using 21st century tools. We also wish to educate our students in a way which will allow them to become global citizens and future leaders.

Developing these advanced learning skills are essential for our students as they prepare for a world defined by constant change, revolutionary technology and rapid access to global information and resources.

When we put mobile computing devices in the hands of our students, we significantly enhance their learning opportunities. Moncton High, in partnership with The Anglophone East School District has decided to purchase increased wireless internet capabilities and to allow students to bring to classrooms their own wireless capable devices to support their learning. The expense of the increased wireless accessibility will be covered by MHS and the District and allow both teachers and students to access learning beyond the textbook and classroom.

We ask that we work together on all areas of Mobile Computing. As with anything new, there will be challenges and opportunities to improve.

Thank you for becoming partners with us to make Mobile Computing a success for our students and enabling our students to be successful in life. Their classrooms will be more engaging and provide them with the relevant skills and knowledge needed for today's careers.

Sincerely,

Mike BeLong, Principal  
Moncton High School
