GENERATION

Secrets to Connecting with Today's
Teens & Young Adults in the Digital Age

TIM ELMORE

"A timely and perceptive study... more importantly, a must-read guide
for parents, mentors and teachers... a valuable and wise resource."

Mark Bauerlein

Writer, The Wall Street Journal • Faculty, Emory University • Author, The Dumbest Generation

Fact

- By 2011, more than 1/2 of the world population was under 25 years old.
- We are the 1st generation of parents to raise our kids with the Internet.

Challenge

- They don't need us for *information*, but for *interpretation*. We must help them make sense of all they know. Our job isn't to enable them to access data but to process data and form good decisions.
- 1st step – enable them to recognize their passions and strengths and use them to engage the world around them.
