

Work Together – Grow Together – Learn Together

Dedicated June 1, 2016

Scotts Canada, a subsidiary of the Scotts Miracle-Gro Company, along with its philanthropic partners, believes in the life-enhancing qualities that gardens bring to people and our environment. With proper care, a garden will flourish and give back, season-after-season, providing countless benefits for generations to enjoy. It is our hope these gardens will unite local residents, encourage harvest donation and bring joy to those who pass through them.

Princess Elizabeth School and the City of Saint John share a vision of this space being an asset to the entire community. Around this garden friendship, knowledge and pride will grow for years to come. The serenity and natural beauty will not only provide a relaxing meeting place for all to enjoy but also a hands on learning opportunity where students will experience healthy, sustainable ways of producing food in cooperation with others. Bringing the community together to create learning for all!
