

## Anaphylaxis Station @ Back Bay School

We have chosen to place a publically accessible epinephrine kit in our school. Our kit will have both pediatric and adult dose epinephrine and will be kept up to date as these items are time sensitive.

Anaphylaxis is such a scary situation, and a quick response with epinephrine is life-saving! This is strictly a publically accessible kit for those students/staff and potential visitors that is not yet diagnosed and does not have readily accessible epinephrine. Training for the staff is essential because with knowledge comes the comfort level to **quickly** access the kit in those vitally important early minutes!

Be Ready Health Care Inc., a health care provider in Sussex, has provided us with the kit that will be placed on the wall beside our community defibrillator. As the epinephrine pens are time sensitive we will be required to renew them after a 12 – month period. We hope that you are willing to help us with this yearly cost.

If so please let us know by contacting us at 755-4028.
