Frequently Asked Questions

What if parents cannot speak French?

There is no expectation that parents of students in any of the program options must be able to speak French. All program options are designed for children whose first language is not French.

How can I help my child?

You can read to your child at a young age. This strengthens literacy skills for first and additional language learning. Additionally, parents can help by communicating regularly with their child's teachers. It is also valuable for parents to encourage their child to read and write in both English and French and to listen to French music, radio or television.

What if my child needs support?

French and English are the Official Languages of Canada and New Brunswick. All students in the anglophone sector have the opportunity to learn French. All programs can meet the needs of learners. There are a variety of ways to support student success in French second language. This can include the use of a Personalized Learning Plan, curricular adjustments, accommodations, universal learning supports as well as strong and inclusive classroom practices.

Will my child learn the same things as children in English classes?

The curriculum follows the guidelines of the NB Department of Education and Early Childhood Development. Students work towards the same goals for all subjects regardless of language of instruction.

These models will differ from the program information in this brochure. Parents/guardians of children attending the selected schools will be provided the program details.
