

This week in Grade 3

April 16th - April 20th

Our words of the week:

1. unhappiness
2. general
3. make
4. put

Every Friday we will have a spelling test on these words. Please practice these words every night at home so your child knows how to spell them and read them in a "snap".

Literacy: This week we will be learning about parenthesis and will review semi-colons. We will also continue to write book reviews to share with other students. Students will be reviewing the sounds for ai/ay and ou/ow.

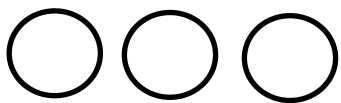

Writing: This week we will be finishing our independent procedural pieces and will begin letter writing.

Math: This week we will be learning about division through equal groups as well as repeated subtraction. Please Practice this at home as it is a hard concept for most students. Students will be working on the 2 times tables this week. Please continue practicing these at home as it will only help your child be successful and feel confident.

Division through equal groups

Ex: total # of objects \div # of objects in each group = # of groups

$15 \div 5 = ?$ Students will place objects in groups of 5 until they get to their total number of objects (15). The number of groups they have is the final answer.

Repeated Subtraction for Division:

Students will subtract the # of items from the total # of objects until they get to 0. How many times they subtracted is their answer.

Ex: $20 \div 4 = ?$

$$20 - 4 = 16$$

$$16 - 4 = 12$$

$$12 - 4 = 8$$

$$8 - 4 = 4$$

$$4 - 4 = 0$$

} subtracted 5 times (answer is 5)

Reminders:

Wed, April 18th - Book Orders Due

Thurs. April 19th - Zumba \$2
