

UNIVERSITÉ DE MONCTON
EDMUNDSTON MONCTON SHIPPAGAN

Formation continue

February 2, 2018

Dear Sir or Madam:

My name is Dany Benoit and I am the Director of Academic Development at the Continuing Education of the Université de Moncton. For over thirty-five years, the Université de Moncton has been offering a French Immersion Summer Program that has been attended by students from all around the world. People from different walks of life have attended our immersion programs, most wanting to acquire or enhance their second language skills.

Our Program provides what we have come to believe best meets our students' language needs during their stay at the university. This objective is attained through formal teaching, workshops and a variety of activities. In all, five different competency levels are offered, ranging from beginner to advanced. The language level of a participant is determined by a placement test at the beginning of the program, which then allows us to create homogeneous groups of learners.

The beautiful city of Moncton is situated in southeastern New Brunswick, and lies in the geographic center of the Maritime Provinces. Moncton has a population of 140,000. The province of New Brunswick, with its natural wonders and its unique blend of cultures, attracts thousands of tourists every year.

Please find enclosed our brochures describing the French Immersion Summer Program being offered from July 1 to August 3, 2018. You will also find a pdf version of this brochure, the fees and the registration form on our website at the following address: www.umoncton.ca/learnfrench/explore.

In closing, it would be greatly appreciated if you would make this information accessible to as many people as possible, so that people may consider registering to our French Immersion Summer Program as soon as possible. I thank you in advance for your collaboration.

Best regards,
