Important Food Bulletin - Updated September 7, 2017 Allergy Alert (Policy 704)

Hi everyone, it has come to our attention that the document that went home regarding food allergies did not state clearly enough the foods that some of students have allergies against. That being the case we must ask that **foods containing nuts of any kind** be omitted from all snacks and lunches. Not only that, we also need to add **shellfish** to the list as a food which we must avoid bringing to school in student lunches. At this time we will continue permitting foods containing tuna and salmon.

For some students any minimal contact with the aforementioned products and their derivatives may cause anaphylactic shock (severe allergic reaction) and unconsciousness.

We thank you in advance for your co-operation in this matter in order to minimize as much as possible the potential threat to our students.

Sincerely,
Gary Gallant, Principal
