

Multiplication Three in a Row

a game for practicing 2 digit by 2 digit
multiplication

Print & laminate the Game Board & Problem Board for students. Each student will need a copy of the recording sheet to show her/his work.

Directions: Student A chooses a problem from the Problem Board, crosses it off, solves it, and marks the answer off on the Game Board using a dry erase marker. Student B does the same. Play continues until a player has marked off three products in a row vertically, horizontally, or diagonally. There is an answer sheet for teachers to use to check student work.
