

Master 4.26

Extra Practice 6

Lesson 6: Investigating Angles in a Triangle

1. Determine the measure of each unknown angle without measuring.

2. A student drew 4 different triangles. She recorded the angle measures in a table.

Triangle	$\angle A$	$\angle B$	$\angle C$
a)	50°	40°	90°
b)	37°	33°	120°
c)	82°	24°	74°
d)	60°	57°	51°

Did the student measure the angles in each triangle correctly?
How do you know?

3. Find the measure of the third angle in each triangle.
- a) A triangle with two angles measuring 110° and 45°
 - b) A triangle with one right angle and a 40° angle
 - c) A triangle with two angles measuring 60°
