September, 2013

Dear Parent/Guardian:

As the Superintendent of Anglophone West School District I wish to inform you that we support a healthy learning environment for all students. In an effort to support student well-being, high schools in the district have partnerships with providers from various community agencies to offer services within the school setting.

Services that may be available to students in their school and community are provided by Mental Health & Addictions and Public Health Programs (Sexual Health Program, Healthy Learners in School Program, Immunization Clinics and Early Childhood Initiatives). These well established, credible services have existed in our high schools for a number of years. Any further health services that have the potential to be added will continue to be vested through proper process.

Referrals can be made by parents/guardians, guidance counselors, service providers, teachers or students themselves. The *Medical Consent of Minors Act* gives students the right to seek these services without parent/guardian consent. Visit this internet web site to view the act:

<http://www.canlii.org/en/nb/laws/stat/snb-1976-c-m-6.1/latest/snb-1976-c-m-6.1.html>

Anglophone West School District remains committed to providing students with a healthy, supportive environment for learning, with emphasis on health promotion and the development of positive decision-making skills.

Yours in Education,

Superintendent of Schools,
Anglophone West School District
