

# Nackawic High School Graduation Pathways for Mathematics

Each pathway is designed to provide students with the mathematical competencies and critical thinking skills they will need after high school. Students should select courses in the pathway that best fits their interests and plans for after high school. Each pathway provides students with a different focus on math concepts and skills. Students may choose to take additional mathematics courses beyond the graduation requirements to better prepare them for what they want to do following high school.

**Important Notes:** Graduation requirements have recently changed for math. Students entering grade 12 in September are only required to completed 1 credit in math at the grade 11 level (Fin and Workplace 110 OR Foundations 110). However, students entering grade 11 in September need to complete 2 math credits. Please refer to the diagram below for the various options.

It is important to confirm entrance requirements for the specific program(s) in which you are interested.  
Requirements may vary between institutions and programs of study.
