

# Park Street After School Opportunities

February 9, 2017

Park Street is pleased to partner with Horizon Health and Dr. Barnhill, orthopedic surgeon in offering an enriched afterschool opportunity called “**Physicians and Health Care.**”

The purpose of this program is to give students an opportunity to learn the following about medicine – Fractures/ bone healing and remodelling , casts and immobilization, arthroscopy and surgical instruments and basic techniques. There is an opportunity for a follow-up Q and A session on a 5<sup>th</sup> week if there is lots of interest by the students. Since we just heard from the physician today about dates, you will need to reply very quickly as the first date is this Monday, February 13.

The club will run each **Monday** on the following dates: Monday February 13, February 20 February 27 and March 13 with the Q & A session on Thursday, March 16.

Due to the nature of the activities, the organizers are currently only opening the after school club to **12** students. Because of the quick turn around time, we will need to collect all application forms on Friday, February 10.

If your child is interested in participating in this club “Physicians and Health Care”, beginning on Monday, February 13 please complete the form below and return it to the office tomorrow, February 10.

---

I give my child \_\_\_\_\_ in \_\_\_\_\_ class to participate in the enriched afterschool **Physicians and Health Care** opportunity from 3:15 – 4:15 at Park Street School beginning for 4 weeks on **Monday, February 13, 2017.**
