

ENERGY MANAGEMENT

Category:

Facilities

Effective:

January 2022

Policy Statement

Anglophone West School District strives for excellence in energy management and will:

- promote the efficient use of energy in its schools
- establish energy performance improvement objectives during Facilities' annual planning process and targets during the development of energy performance improvement action plans
- provide the necessary information and resources to achieve our energy performance objectives and targets.
- commit to continually improve the energy performance and the energy management systems within its schools while student and staff comfort levels are maintained and or improved.
- comply with applicable legal, codes and standards as well as other requirements impacting energy use, consumption, and efficiency.
- advocate for the procurement of energy-efficient products and services.
- encourage design activities that consider energy performance.
- continue to educate and raise awareness among students and staff regarding energy management best practices.

This Energy Management Policy applies to energy-consuming infrastructure systems and equipment owned/controlled by Anglophone West School District as defined in the scope of the Energy Management System Manual.

Procedures

All procedures are documented in the Anglophone West School District Energy Management System Manual.
