STEM

TEACHER AWARD

Nomination Package

Association of Professional Engineers and Geoscientists of New Brunswick
Annual STEM Teacher Award

Almost all of us have had a teacher who leaves his or her mark on our hearts and minds as an important influence. The lessons these educators leave with us often goes far beyond the topics associated with their subjects taught.

APEGNB would like to recognize a few of these remarkable middle and high school teachers who have influenced the lives of our students and made STEM learning fun!

Six awards are available each year. Each recipient will receive a commemorative certificate as well as \$2,000 to be used at their discretion for professional development, school equipment, resource materials, website development, teaching aids, or other tools to improve teaching and student learning.

Your nomination package addressing the award criteria and a completed nomination form can be sent via :

Mail
183 Hanwell Road
Fredericton, NB E3B 2R2

CRITERIA FOR TEACHERS

Please remember that APEGNB's STEM Awards selection committee does not know your nominee so they are relying on your words and examples to determine the teacher's suitability for the award. Clear, concise and specific details will strengthen your nomination.

Your nomination package must contain no more than 5 letter-sized pages—including any supplementary information.

Although not required, nominators may include additional information such as the teacher's résumé, letters of support or newspaper clippings.

Nominators must demonstrate in their nomination package how the teacher meets the following criteria. Note that nominations will be evaluated and scored against these points listed below:

- ✓ Demonstrates innovative teaching that promotes engineering and or geoscience. (50 points)
- ✓ Encourages curiosity and generates excitement in STEM education by engaging students in hands-on interactive activities. (15 points)
- ✓ Organizes STEM activities outside of the classroom. (10 points)
- ✓ Demonstrates leadership among peers by serving as a model of how educators can work with industry to enrich STEM education. (10 points)
- ✓ Increases the understanding of the diverse careers available in engineering and geoscience helps to dispel stereotypes and encourages under-represented groups to consider careers in engineering or geoscience. (10 points)
- ✓ Uses social media platforms (e.g., Twitter, Facebook, Instagram) to promote STEM projects and learning. Please provide examples. (5 points)
