Hewson Home Learning Weekly Plan

Week 3: April 27th - May 1st

Words of the Week:

Try These	Too Hard? Try These Instead
adventure	after
depression	did
impossible	is
really	put
transportation	was

Practice Ideas....try one each day: Write your 5 words in alphabetical order; write them out 3 times using a rainbow colour pattern; try and find a rhyming word for each one; use each word in a sentence and read your sentences to a family member; ask a family member to quiz you and see if you can spell them correctly! ✨

Reading: You should be reading a minimum of 30 minutes each day. I hope you have some interesting books at home. 😊 You can choose from your books or from the following websites:

1. <https://www.tumblebooklibrary.com/Default.aspx?ReturnUrl=%2f>
2. www.kidsa-z.com Teacher Username is MrsHewson5, then click on your name, then enter your password. Each student needs a password and I will email it to parents. It's a number and easy to remember. *****If you need your password, just email me*****

Writing: Some of you worked on biographies last week. This week, if you are stuck for a writing idea, write about yourself! When you write your own life story, it's an autobiography.

*Write down 5 subtopics that you want to tell about yourself. *Ideas could be....general facts about you (age, where you were born, birthday, etc.); your hobbies; things you are good at; your friends; your family; interesting facts about you.*

Activity 1: Number Sense – On your 10x10 grid with numbers 1-100. Colour all **multiples of 8** in a single colour, and **multiples of 7** a different colour.

Practice these number facts with a family member.

Activity 2: Write 3 word problems using multiplication or division. Then show how you can solve them with a drawing and with a written sentence.

Multiplication Example: Landon made 4 pizzas with his mom. They cut each pizza into 8 pieces. How many pieces of pizza did they have in all?

Division Example: A bag of skittles had 28 pieces of candy. If 4 friends shared the candy equally, how many skittles did each friend get?

Activity 3: Play tic-tac-toe with a family member. Try to find a winning strategy.

Next try playing tic-tac-toe on a 4x4 grid. First play where the **first person to get 3 in a row wins the game.** Can you find the strategy where the first to play is always the winner?

Next, using the 4x4 grid, find a strategy for playing where **the first person to get 4-in-a-row loses** the game.

Activity 4: Estimation and Budgeting

Use a sale flyer from the grocery store (or the store website) to estimate the total needed to purchase

*Write your subtopics as heading on your paper and write a group of sentences to go with each one. By the way, you are practicing paragraphing! Paragraphs are just groups of sentences on the same topic. 😊

*Arrange your paragraphs in an order that you like to tell about you. Remember an autobiography is just a writing piece that tells true information about a special person.... You!

*Add illustrations to your autobiography.

*Choose someone to read your autobiography to and share your illustrations.

Have fun! I'm looking forward to reading your interviews!!

If you would rather work on a different kind of writing like a letter or creative story, go ahead! The important thing is that you write every day. You can choose what you would like to write. I look forward to hearing some of your stories or letters or autobiographies!

You can always take a picture of your writing and have your mom or dad send it to me.

You can contact me by email or by phone. My email is Marjorie.Hewson@nbed.nb.ca, and you can call/text me at 425-0206. I will check in with each of you later in the week.

Did You Know?

https://ed.ted.com/best_of_web/nOzzszgA

How can parrots talk like humans?

groceries for a certain meal or recipe. Set a budget (a total amount that you'd like to spend). Think about rounding decimals to the nearest dollar to estimate whether you will have enough in your budget for the items you want to purchase. Next calculate the total and see if your estimation was accurate. Remember to use multiplication if you need to buy more than one of a certain item.

Options for Online Math practice:

For Fun Try to solve this puzzle: (Use +/- and x)

$$\text{net} \times \text{net} = 25$$

$$\text{net} + \text{bee} = 12$$

$$\text{bee} \times \text{net} + \text{bee} = \square$$

Feel free to call/text (477-8103) or email (Bridget.nugent@nbed.nb.ca) with any questions,

to share your work, or to say Hi! 😊

Check out the “*Day of Wonder*” activities below!

A Day of Wonder #2

THE CHALLENGE:

Did you know you could grow a garden without soil? This is called hydroponics. Growing plants hydroponically helps gardeners and farmers grow more food faster, in any season, and in smaller places, like your home.

Your challenge is to germinate seeds using paper towel, water, and a baggie. (Examples seeds: Tomato, pepper, squash, chia, bean, lentil)

Have fun in your learning!

Mrs. Hewson &
Mrs. Nugent

Language Arts:

. **Journaling is a great way to help keep your drawings and other observations in one place and to be able to ask questions about what you have found.

Watch a quick video on being a Field Scientist:

<https://www.youtube.com/watch?v=E6iB5B3Lz9I>

In your journal, create a table with headings labelled observations, measurements, and pictures/drawings. Each day record data under each heading. Don't forget to write the date to help keep track of the growth of your seed.

Numeracy:

If one bee helps pollinate 10 plants or flowers in one minute, how many plants or flowers could the bee possibly help reproduce in one hour?

Use repeated addition to help you or build on a known multiplication fact.

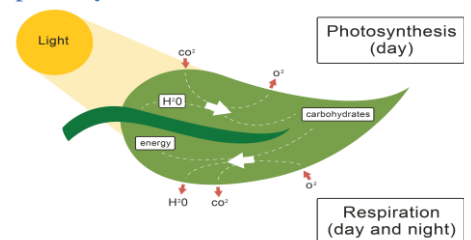

Science/Social Studies:

The process of photosynthesis is how plants survive and thrive in the world. Explain the four needs of plants to survive.
