

ENRICH Your Math Classroom!

October Newsletter

[NRICH Website](#)

This is a free website aimed at enriching mathematical experiences by embedding rich mathematical tasks into everyday practice.

- Usable for K - 12
- Content organized into strands and grade levels
- Real-world math, warm-ups, short activities and weekly problems
- Online activities and printable resources
- Professional development for teachers

[University of Waterloo Problem of the Week](#)

Problem of the Week

A site designed to provide students with ongoing opportunities to solve problems from various areas of mathematics. Teachers can sign up for free to receive an emailed problem for their grade level every week.

- Usable for grades 3 – 12
- Content available in French and English
- Solutions provided
- Archived questions and solutions organized by strand
- Links to enrichment opportunities such as math contests, math circles and real world math connections

[Math Games](#)

Free online games and questions aligned with content areas for grades K – 8. Games can be used for reinforcement and enrichment opportunities both within and outside of the classroom.

- Compatible with Google Classroom and Edmodo
- Multi-platform compatible
- Accessible to teachers, students, and parents
- Data tracking capacity for teachers
- Online activities and printable worksheets
