

9 Science - Power Bill Questions

Pretend it is February 1999 (because that is the power bill that came with the textbook):

How much was the power bill at the same time last year?

How much was the previous power bill?

This bill is charging for how many kilowatt-hours?

What was the meter reading?

What was the previous reading?

How much is the power company charging for one kilowatt – hour?

How much money is owed to the power company?

This bill must be paid before what date?

What could you do to help you remember to pay this bill by the due date?
