Update on Water Quality for New Brunswick Schools

August 2013

This is a current snapshot of the drinking water fountain remedial actions taking place in NB schools. This work is almost fully completed. Along with necessary plumbing upgrades, over 250 fountains have been appropriately and permanently removed. In addition, approximately 150 new fountains have replaced older models with lead or copper issues. 24 schools have water treatment systems with one more pending (see below). Water quality will be monitored on an ongoing basis.

Anglophone East School District (ASD-E): All work completed.

- **Bernice MacNaughton High School** – 1 fountain deactivated (Lead issue); 1 fountain installed; 1 fountain removed
