Positives of being a K-12
learning community

- -students will often work together on a variety of projects across grade levels
- -K-12 school works well for parents as all students are in the same school
- -Strong sense of community , staff know all students and their individual needs
- -School community, students and staff know each other well and there is a strong sense of community and family
- -Older students interact with younger students and are good role models for them and will watch over the younger ones.
- -Many activities such as reading buddies, leadership activities and partnerships exist between the grade levels.
- -With leadership and child studies courses at the high school that require practicums and volunteer hours, the K-5 level receives a lot of support from older students.
- -Grade 11 and 12 students are partnered with K and 1 students for school evacuations. In a past evacuation, when snow drifts were too high for the little ones, the older ones carried their buddy to the alternate site.

- -Builds a stronger community within the greater community.
- -Convenient for parents of multiple children for transportation, extracurricular, parent-teacher meetings, etc...
- -Teachers have the opportunity to appreciate and see the work of their colleagues at all levels.
- -Students can build strong connections with staff and each other and build on these over the years.
- -Older siblings are able to look after younger siblings and take ownership of their well-being.
- -Routines, procedures and expectations are constant
- -Older students are empowered through the ability to form strong bonds with younger students, they are more confident when they are working with their peers.

- -Older students are positive role models during instructional time, on teams and in clubs and committees.
- -Students serve as mentors for younger students with behavior or academic concerns.
 -High school support elementary students through programs such as Reading Tutor and Early Morning Reading.
- -Leadership, Child Studies and Co-op courses allow students to work with younger students not only with academics but also in building connections.
 - -Students are familiar with teachers at all levels.
- -Transitions are easier for students from one level to the next.
- -Collaboration among teachers across levels is easier with curriculum and student information and data.

- -Younger students see the older students leading activities and assemblies, solidifying school identity and school spirit.
- -It is an opportunity for older students to learn about their roles and responsibilities entrusted to them to act with integrity, honesty and kindness as role models for other students.
- -Older students provide a support to elementary level initiatives and programs.
- -High school students have opportunities to be mentors, tutors and participate in co-op learning programs.
- -High School students are able to tutor younger students.
- -Have the support of middle and high students allows for more activities to be offered to elementary students.

Challenges of
being a K-12
learning
community

- -Scheduling can be a challenge across all the grade levels
- -FTE formula allocation does not reflect the various needs of a K- 12 school
- -Course offerings for students at the high school level not as varied as larger high schools
- -Some teachers are teaching at many levels.
- -Inappropriate behavior in front of younger students may occur at times, more frequent as a bus issue

- Inappropriate behavior in front of younger students may occur at times
- -Administration of the school must focus on all three levels with scheduling, curriculum and initiatives. This involves a great deal of emails, and lots to oversee from Pre-K programs to proms and graduation activities.
- Scheduling for common areas such as music rooms, gyms, library, tech labs, cafetorium for all grades is a challenge.
- -One bus run for various maximum hours of instruction with K-2, 3-5 and 6-12.
- -Teacher timetable scheduling is a challenge, especially for those teachers who teach across the levels.
- -With all the various provincial assessments, it can be difficult to manage multiple assessments within the particular time frame.
- -Communication is increased due to number of emails when responsible for curriculum and initiatives at all three levels.
- -Can be difficult to keep staff informed of activities, behavioral incidents, student progress etc...
- -Perception amongst colleagues regarding equality of teacher work

- -Elementary students who exhibit same behaviors as older students.
- When an older student is not being a positive role model for younger students.
- -Scheduling of common areas such as library, gym and cafeteria can limit activities at certain times of the day.
- -There is a need for more administrative support and more guidance support.
- -Due to all the levels and the size of the building and grounds, there is lots of supervision for teachers which cuts down on time for committees and clubs at lunch time for students.
- There is a vast amount of information and data that must be managed by admin staff, and teaching staff.

- -Scheduling can be a challenge across all the grade levels including bell schedule, supervision duties, meetings for school management and various committees
- -ESS team/FTE allocation is calculated by the number of students and does not meet the needs of a K-12 school.
- -School has only one bus run, this extends the day for elementary students. The younger students travel on the same buses as Middle and High students.

load, turnaround days, exam week etc	
-Office staff is unable to adequately meet all the demands for a 3 level school with CashNet, Pre-K programs, scholarships, inputting student information etc (school has paid for extra administrative days to complete these items in a timely manner)	
-Attending meetings for staff that work across the grades levels, many meetings and raises questions of which required meeting to attend. -Limited guidance FTE to serve the varied needs of students at all three levels.
