Suggestions for implementing Curriculum Compacting

➢ **Start the compacting process by targeting a small group of students (2-3 students) for whom compacting seems especially appropriate**

➢ **Select one content area in which the targeted students have demonstrated strengths or for which you have the most resources available to provide enrichment activities.**

➢ **Try various methods of pre-testing and assessment.**

➢ **Compact by unit, chapter or by topic rather than by time. (i.e. marking period)**

➢ **Decide how to document compacted material and define what level of mastery (80%-100%) is expected from students.**

➢ **Request help from all available resources in order to create a wide variety of opportunities for enrichment**

➢ **Keep trying and reflecting on what has worked and using new ideas.**
